

System Components

1. Login

The Login module authenticates registered users and redirects them to their role specific dashboard. It verifies user credentials against the database and ensures only valid users can access the platform. Once authenticated, the system automatically loads the correct dashboard based on the user's role.

Features

- Password Authentication
- Role Selection (Club Admin, Lab Admin, Student)
- Role-Based Dashboard Redirection

2. Register

The Registration module allows new users to create an account by providing their personal details and selecting their appropriate role within the system. It captures essential information and validates it before saving the new user to the database. This ensures every account created is complete, unique, and correctly tagged to a role from the start.

Features

- Personal Information – Full Name, Email, Password, Mobile Number
- Role Selection – Club Admin, Lab Admin, or Student
- Input Validation – Ensures accurate and secure registration
- Account Creation – Registers users into the platform

3. Club Admin Dashboard

The Club Admin Dashboard gives club administrators a quick overview of ongoing club activity, including events, inventory, and support tickets. It consolidates key statistics in one place so admins can track club performance without navigating to individual modules. This helps admins quickly identify what needs their attention, such as pending tickets or low inventory.

Features

- Upcoming Events Count
- Active Volunteers Count
- Inventory Items Count
- Pending Tickets Count

4. Events List (Club Admin)

The Events List displays all events created by the Club Admin along with their current approval status. It gives the admin a centralized view of every event, whether newly created, pending review, or already approved. From here, admins can manage the full lifecycle of an event.

Features

- Event Name and Status Display (Approved / Pending)
- View Event Details

5. Create Event

The Create Event module allows the Club Admin to submit a new event for approval by the Lab Admin. It collects all necessary event details, including schedule, venue, and capacity, in a single structured form. Once submitted, the event enters the approval workflow and cannot go live until the Lab Admin reviews it.

Features

- Event Name and Description
- Date & Time Selection
- Venue / Lab Selection
- Max Participants Limit
- Category Selection
- Submit for Approval (sent to Lab Admin)

6. Volunteers (Club Admin)

The Volunteers module allows the Club Admin to track and manage the work status of all club volunteers. It shows which tasks have been assigned to each member along with their priority level, so the admin can monitor progress at a glance. The admin can view whether a task is ongoing or completed, helping ensure club activities stay on track and no assigned work is overlooked.

Features

- Volunteer List with Assigned Tasks
- Task Priority Indication (High / Medium / Low)
- Work Status Tracking (Ongoing / Completed)
- Assign Task to Member
- View Volunteer Progress

7. Inventory (Club Admin)

The Inventory module lets the Club Admin track and manage all club equipment available for club use. It shows real time availability so admins know exactly what is in stock and what has been borrowed by students. This helps prevent equipment shortages and keeps borrowing records accurate.

Features

- Item List with Available and Borrowed Quantities
- Borrow Item
- Return Item
- Add New Inventory

8. Add Inventory

The Add Inventory module allows the Club Admin to register new equipment into the inventory system. It records key details like quantity, category, and cost so every item is properly documented from the moment it's added. This keeps the inventory database accurate and easy to audit later.

Features

- Item Name
- Quantity
- Category Selection
- Description
- Add Item to Inventory

9. Add / Edit Volunteer

The Add/Edit Volunteer module allows the Club Admin to search for a member by name and assign them a task along with its priority level. It also lets the admin edit an existing assignment, such as changing the task, reassigning it to a different member, or updating the priority. This gives the admin a quick, direct way to delegate and adjust volunteer work without going through the full volunteer list.

Features

- Search Member by Name
- Assign Task to Member
- Set Task Priority (High / Medium / Low)
- Edit Existing Task Assignment

10. Support Desk (Club Admin)

The Support Desk allows the Club Admin to manage and resolve tickets raised by students. It centralizes all reported issues in one queue so nothing gets missed or forgotten. Admins can track each ticket from submission to resolution, keeping communication with students clear and organized.

Features

- Ticket List with Status (Open / Resolved)
- View Ticket
- Reply to Ticket
- Close Ticket

11. Lab Admin Dashboard

The Lab Admin Dashboard provides a summary of pending approvals, bookings, and equipment availability. It gives the Lab Admin a snapshot of what requires immediate action, such as event requests or slot conflicts. This helps the admin manage lab resources efficiently without missing pending tasks.

Features

- Pending Requests Count
- Today's Bookings Count
- Available Equipment Count
- Slot Requests Count

12. Event Approvals

The Event Approvals module allows the Lab Admin to review and approve or reject events submitted by the Club Admin. It gives the Lab Admin full visibility into each event's details before granting lab access. This ensures only verified, conflict-free events are allowed to proceed.

Features

- Event List with Submission Details
- Approve Event
- Reject Event
- View Event Details

13. Slot Calendar

The Slot Calendar allows the Lab Admin to view a monthly calendar showing which lab slots are already booked and which are still available. It presents a clear, visual, month-based layout so the admin can quickly spot open dates versus conflicts. This helps the admin plan lab bookings efficiently and avoid double-booking the same slot for multiple events.

Features

- Monthly Calendar View
- Booked Slot Indication
- Available Slot Indication
- Conflict Indication
- Book Slot
- Cancel Slot
- View All Bookings

14. Student Dashboard

The Student Dashboard gives students an overview of their event participation and borrowed items. It summarizes their activity on the platform, from events they've joined to equipment currently in their possession. This gives students a quick snapshot of their involvement without digging through separate pages.

Features

- Ongoing Events Count
- Applied Events Count
- Closed Events Count
- Borrowed Items Count

15. Events (Student)

The Events module allows students to browse and register for club events. It lists all available events along with their current status, helping students decide what to join. Students can register for open

Features

- Event List with Status (Ongoing / Closed)
- View Event Details
- Register for Event

16. Event Detail

The Event Detail page displays complete information about a selected event and allows the student to register. It provides all the context a student needs, such as schedule, venue, and remaining slots, before committing to join. Students can also volunteer for the event or share it with others directly from this page.

Features

- Event Name, Date, Venue, and Description
- Available Slots Display
- Register Now
- Volunteer for Event
- Share Event

17. Inventory (Student)

The Inventory module allows students to view and borrow available lab equipment. It shows real time stock levels so students know what's currently available before requesting an item. Students can also review their own borrowing history to keep track of what they've taken and returned.

Features

- Item List with Availability
- Borrow Item
- Return Item
- View Borrow History

18. Volunteers (Student)

The Volunteers module allows students to view the tasks assigned to them by the Club Admin and update their progress. It shows each task along with its priority, so students know what to focus on first. Students can mark their work as ongoing or completed, keeping the Club Admin informed of real-time progress.

Features

- Assigned Task List with Priority
- Task Status Update (Ongoing / Completed)
- Task Details View
- Progress Tracking

19. Support Desk (Student)

The Support Desk allows students to raise and track issues they face while using the platform. It gives students a direct channel to report problems, such as registration errors or borrowing issues, to the Club Admin. Students can follow the status of their tickets until the issue is resolved.

Features

- Ticket List with Status (Open / Resolved)
- View Ticket
- Reply to Ticket

20. Raise Ticket

The Raise Ticket module allows students to submit a new support request to the Club Admin. It captures the issue in a structured format, including subject and category, so admins can prioritize and respond faster. This ensures every problem is logged and doesn't get lost in informal communication.

Features

- Subject
- Category Selection
- Description
- Submit Ticket
